Meeting with the Writing Center

Abstract:
- Sentences and structure were direct and clear
- Discuss findings briefly in the abstract

Introduction:
- Looking to clean up the phrasing
- Replace "run" with "ran"
- Replace "what most often is causing" with "what is most often causing"
- Be consistent with "data-set" and "data set"
- A couple spots where phrasing was a bit confusing:
    - Paragraph 2 has a long sentence, with repetition and should rephrase
    - Break up the sentence into two
    - Replace "what most often is causing" with "what is most often causing"
- Top paragraph on second column
    - Don't use "seems to" wording
    - Remove all the paper names and clean it up on the bottom of the first column
        - Have specific facts about important ones
    - Elaborate on the last sentence, more on the gap in related work
- Finish the work in progress section

Related Work:
- "Additionally" in the first paragraph should start its own sentence
- Make it "provided" in the second paragraph instead of present tense
- Make sure that it is clear quickly what each related work pertains to
- Review the initial introduction paragraph and see where it overlaps the
- Third paragraph is a bit longer, evaluate if it is really

Analysis and Results:
- Have a bit of wording to set up the results like "we will talk about our results for these sections

Conclusions:
- Similar format to the introduction, but be more condensed
- Sum up analysis and results here in a way different from the introduction but presented elsewhere in the paper
